

ECOKRAFT HACKER/SHREDDER HA

COLLECT, SHRED AND CONVEY

AREAS OF APPLICATION

Products made of wood and wood-based materials are subject to an increasingly shorter life cycle. Waste wood, wood-like scrap and residual materials accumulate in large quantities after use or at wood-processing companies and have to be processed.

A wide range of shredding tasks can be realized with our compact and reliable machines. Depending on throughput and material, the machines can be individually adapted to different tasks.

ADVANTAGES

- ✓ Easy to use
- ✓ Simple filling
- ✓ Various sizes available
- ✓ Versatile use
- ✓ Individual extraction possible

ECOKRAFT HACKER/SHREDDER HA

The universal single-shaft shredders from ECOKRAFT are an ideal preliminary stage in the shredding of very coarse material. Subsequently, the pre-shredded material can then be processed to a perfect input size for pelletizing with the help of an ECOKRAFT pellet mill. Each shredder has an automatic shut-off function when the material hopper is empty. Control cabinet included.

High-performance and reliable gear motor

Exchangeable, screwed sieve with different sieve diameters.
Discharge via suction, discharge screw or conveyor belt

Rotor is driven by V-belt and gearbox
