

ECOKRAFT PELLET MILL LP22

INTELLIGENT, FAST, MOBILE

AREAS OF APPLICATION

The ECOKRAFT LP22 pellet mill is specially designed for dry and fine-grained biomass with a max. size of 6mm. The modern and highly efficient press has a 22 kW electric motor, a touch display for operation, an integrated lubrication and water pump and a new plug & play system, where further ECOKRAFT machines can be connected at any time and then operated as a complete system.

ADVANTAGES

- ✓ Compact size
- ✓ High added value due to transformation of raw materials
- ✓ Simple operation
- ✓ Remote monitoring of the plant possible

ECOKRAFT PELLET MILL LP22

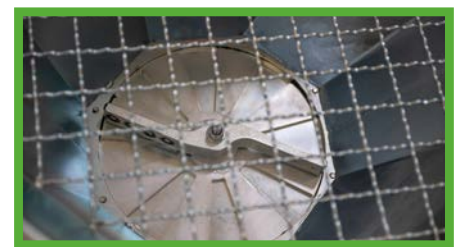

The ECOKRAFT LP22 is the new NON PLUS ULTRA in terms of compact pelleting paired with highly efficient control technology. A powerful 22 kW motor, a completely revised collating system and a technically simple plug & play system for the integration of further Ecokraft machines characterize this trendsetting pellet mill. A change of the pellet diameter or a change to another biomass can be realized within a short time.

High quality hardened flat dies available for different pellet diameters and different press channel lengths.

The Kollerset is designed as a well thought-out, as durable as possible, quickly exchangeable and thus user-friendly complete unit.

The mixer located in the material hopper prevents possible "bridging" of very light materials. Furthermore, strong magnets are integrated on the mixer, which can sort out possible foreign bodies such as nails or metal chips for the most part.

SPECIFICATIONS

TYPE

LP22

Weight	850 kg
Total power	max. 24 kW
Connected load	63 A
Supply voltage	400 V AC 3PH, N, PE
Mains frequency	50 Hz
max. short-circuit current I	10 kA
Control voltage	24 V DC
IP degree of protection	Control cabinet IP 54 machine IP 44

Width A	700 mm
Length B	1,550 mm
Height C	1,590 mm
